Air Seeder Parts

Corrosion-resistant 304 stainless steel and high abrasion and wear plastics.

Patent-pending new design has individual row shutoff with both manually and automatically operated slide gates.

Parts are **produced with computer-controlled equipment** such as CNC lasers, press brakes and mills. No human error.

Interchangeable and priced comparable to factory-made parts.

This exclusive single-wall design doesn't allow fertilizer dust to accumulate in an air cavity. No air cavity means **no swelling or distortion**.

These units are **washable**, with a cleanout at the bottom of the meter. They require no foam, and are maintenance-free with **no need for grease**.

1-Year Warranty

Made in the USA

White LED CabCAM Systems **LED**

White LED Illuminators work more effectively in air seeder tanks than infrared due to dust and debris and reflection.
